

NOAIS-Form 2 Spatial Subtest

- **Instructions:**

The test contains two main types of items:

Sets/Groups: The shapes or matrices are related according to one or more underlying spatial rules. Your task is to identify these relationships and determine the missing element.

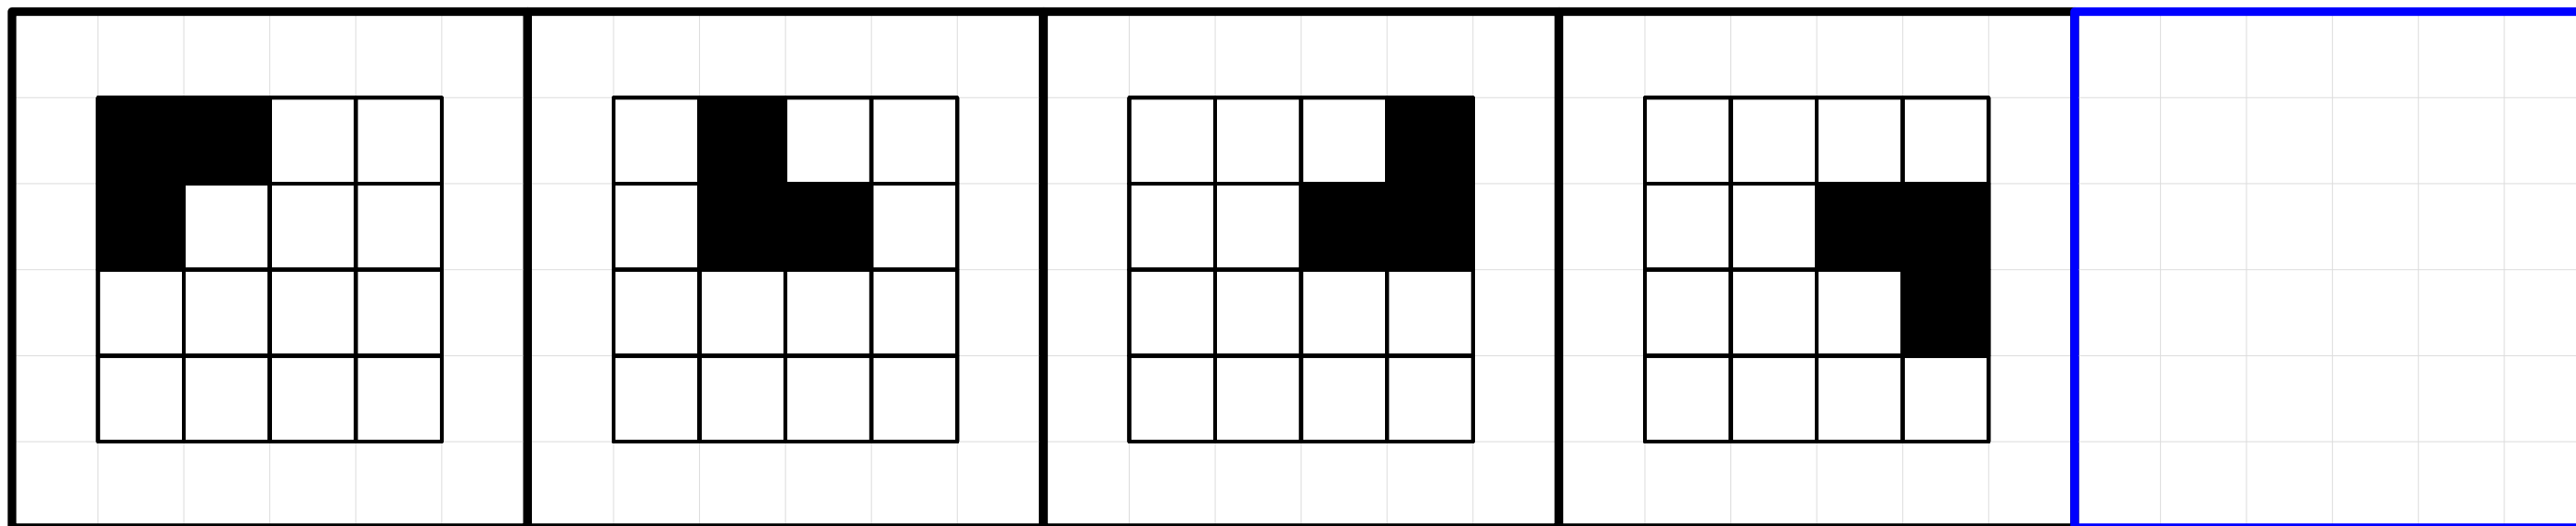

Sequence: The shapes or matrices follow a logical progression. Your task is to identify the pattern and determine the missing element.

Some items combine both types of reasoning.

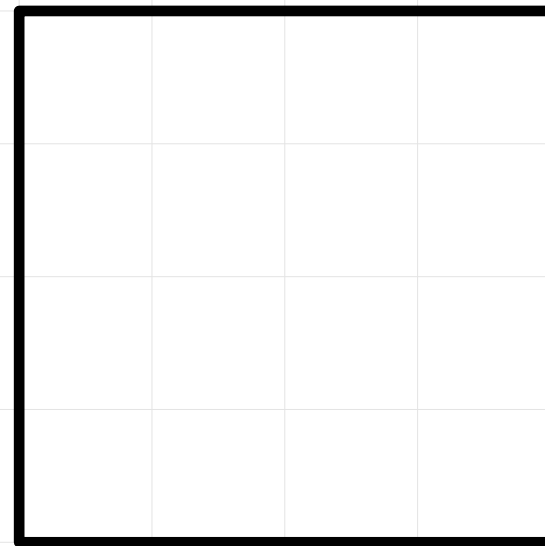

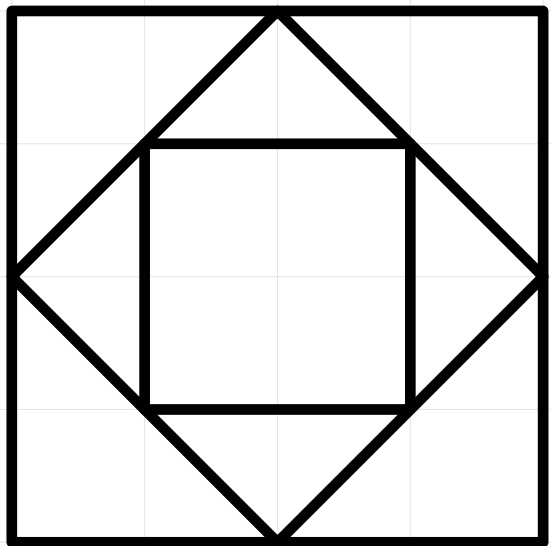

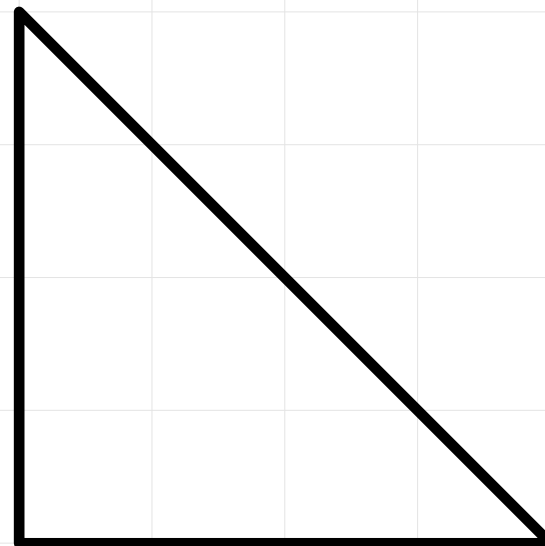

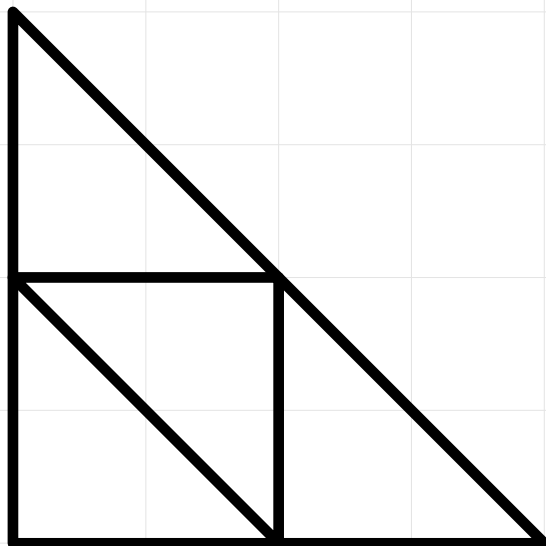

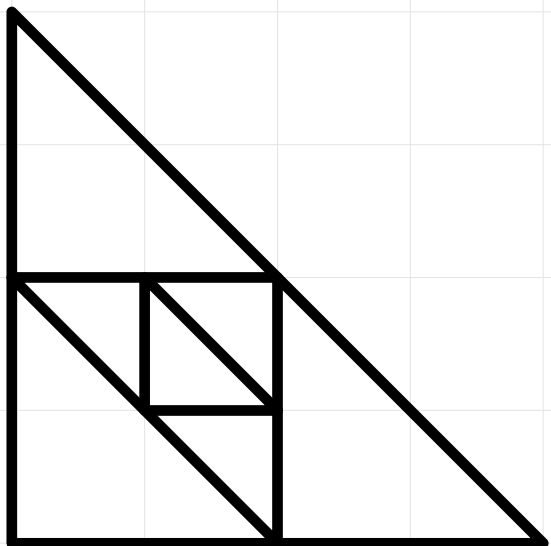

The items may involve both 2D and 3D spatial transformations.

You can only give one answer for each item.
